

GET PAST YOUR  
COMPETITORS  
AND WATCH  
YOUR BUSINESS  
GROW

## About Us

Established in 1994, SoftwareApps.NET provides business automation services in tens of countries and in 48 states for the private, public, and non-profit sectors.

Our vastly-experienced staff is dedicated to providing fully-customized IT and business automation services helping businesses automate processes, reach maximum efficiency, increase growth & profit potential, and get ahead of competitors.

***We also do this without ever having to change your current processes or software platform.***

### We provide:

- BPA Software Development
- SaaS & Cloud Services
- ERP/CRM Development
- Extensions of Existing IT Systems
- Workflow Process Automation
- Database Integration & Development
- Application Integration & Centralization

- **Streamline business processes** and eliminate inefficiencies
- **Free up vital resources** and let your workforce focus on what they do best
- **Minimize wastefulness** and eliminate human errors
- **Maximize productivity** and improve employee collaboration
- **Gain that vital edge** to get past your competition
- **Add value for your clients**, grow your business, and increase profits

## Operate at Peak Efficiency with Minimum Resources

- Over 20 years of experience
- Certified staff in over 20 IT areas
- Vastly-experienced in a wide variety of industries
- Multinational recognition and a growing reputation
- Certified partners with the most reputable firms in the industry
- Operating in numerous countries and in all 48 continental states
- Fully-customized solutions completely tailored around your business

### Phase One: Comprehensive Business Assessment

First, we conduct a comprehensive assessment of your business processes to determine inefficiencies and areas of weakness. Then, we provide you a formal Proposal detailing recommendations and solutions.

### Phase Two: Testing & Evaluation

Once frameworks agreed upon, your systems are built and tested within our secure lab environment. They are stressed against a myriad of possible scenarios and fully-tailored to your business. This is where you will see your system's benefits without any exposure.

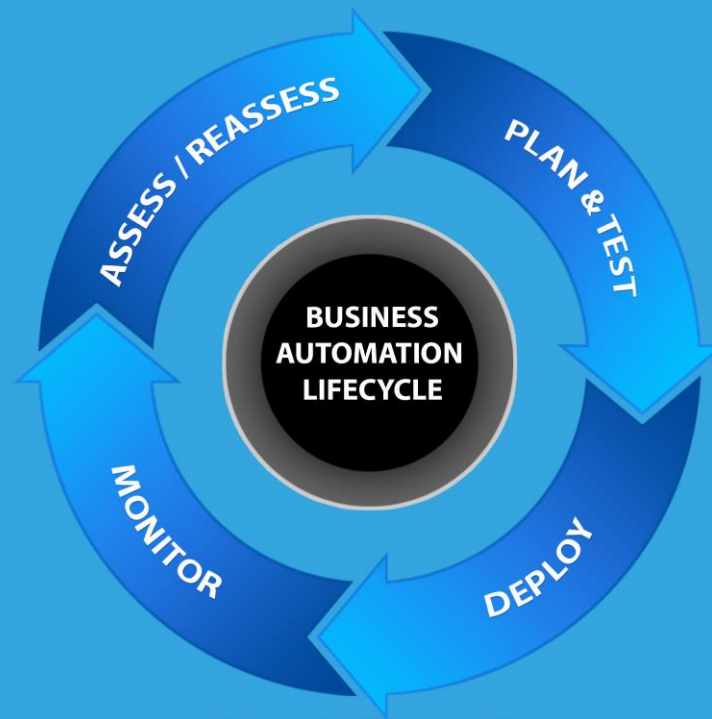

### Phase Three: Deployment

Once you approve your revamped systems and processes, your staff will be prepared and trained before we finally implement and deploy your systems.
